

SPRING™

DISINFECTANT GENERATOR

ON-SITE HOCL GENERATION SYSTEM PROVIDES DISINFECTION FOR:

- ▷ DRINKING WATER
- ▷ SURFACES
- ▷ CIP SYSTEMS
- ▷ EGG WASHING

The SPRING generation system produces hypochlorous acid (HOCL), a powerful and effective disinfectant that is safe for people, pets, and the environment. HOCL is the active ingredient in bleach, but it is much less irritating and corrosive. It is also effective against a wide range of pathogens including bacteria, viruses, and fungi.

Our on-site HOCL generation system is easy to use and requires minimal maintenance. Simply add salt and water, and the system will generate HOCL on demand. You can use HOCL to clean and disinfect drinking water, surfaces, CIP systems, and even egg shells.

Manufactured by:

ON-SITE GENERATION ADVANTAGES

- ✓ NO MORE HAZARDOUS CHEMICALS
- ✓ NO MORE HEAVY CONTAINERS
- ✓ NO MORE EXPENSIVE SHIPPING COSTS
- ✓ ELIMINATE THE USE OF HYDROGEN PEROXIDE AND CHLORINE DIOXIDE

TREATS UP TO 60,000 GALLONS OF DRINKING WATER PER DAY
